

More About Achieve Employment

Our program offers assessments of the person's current skill level, identifies career interests, explores different jobs, helps them develop job skills, assists them with resume' creation and posting and helps them create a profile on the Wisconsin Job Network website.

With our network of over 200 local businesses, we are able to provide opportunities for some individuals on a temporary basis. Each person has personal goals, and we provide support that coincides with their goal. Employment assistance is provided to people who are able to work competitively as well as those who require longer term (job coaching) support.
